A Personalized Approach

Students begin by taking an adaptive assessment that places them on their personalized learning path. Explicit instruction and interactive videos introduce them to new concepts and sounds. Learning games allow them to work independently. If they need additional support, they are given opportunities for guided practice. An end-of-year assessment shows how much students' literacy skills have grown.

Everybody Loves Smarty Ants!

Smarty Ants builds foundational reading skills in an interactive and adaptive learning environment designed to instill a love of reading in students in PreK-2. "Coach," their personal ant guide, leads them through animated lessons and activities while providing encouragement along the way.

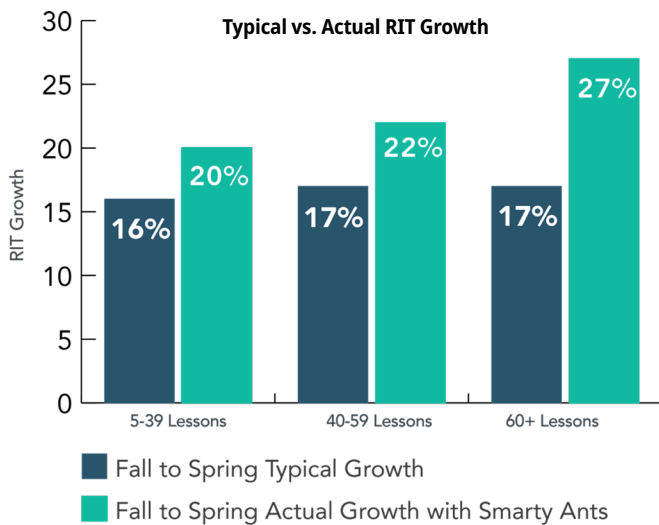

Multisensory Learning for Every Student

Young children learn about their world through sensory exploration. The same is true for language acquisition, especially for students struggling with dyslexia and other learning challenges. Children love to sing songs, record, and listen to their own read-aloud practice, and develop fine motor skills as they follow Coach through their personalized reading adventures.

Dual and Spanish Language Options

Smarty Ants Español provides young learners with foundational Spanish literacy learning from preschool through first grade. Students from every background enjoy singing songs and playing games while supporting their Spanish literacy growth.
